Subject: Please read this....

Dear Commissioners,

Could you please take just a moment to take a breath....this zoning process is about to get out of hand. I don't own but 7 acres so I don't have land to divide and sell, but I have friends that do own larger parcels of land and for you to presume to tell them that their land is worth nothing is WRONG.....it is just WRONG. The way the economy is going it is going to take care of mass building because people will not be able to afford it on any scale.

One more thing that really bugs me.....most of the valley has covenants on it that describe how the property can be divided and what can be put on the property i.e.: homes, trailers ect. As a Realtor it is very hard to find a parcel that does not have covenants they just about don't exist. So why do we need zoning????? Are you all so lazy that you can't come up with a process that developers can work with one that dose not change every five minutes?

The company you have hired Clarion (sorry I may have spelled it wrong) are just like all the other bureaucrats in Washington that drive a desk and don't have a clue about our Valley and what is good for the Valley.

You were elected to do what was right for the Valley not what was the easiest way out....if you didn't really want the JOB as a commissioner why do you run for office?

It is time to stop passing the buck on to some one else and do the job you were elected to do.

Thank you for reading this mail. It won't be the last..
